Details for Grant Call Application

The description of the research project should be no longer than 10 pages and must include the following:

a. Scientific rationale and specific clinical need to be addressed
b. Indicate why a collaborative approach is needed and explain how the collaboration between the participants will benefit research.
c. Specific aims and how these will be addressed in each year of the project.
d. Details on how the co-PIs will work together to achieve these goals such as the environment(s) in which the collaboration would take place, how collaboration will be managed, a plan for regular meetings, strategy for setting up of networks, arrangement for assessment of information, tissue samples, equipment, etc.
e. Describe industry collaborator’s role and contribution in the proposed project. This could be in the form of support to either or both of the basic and clinical co-PIs and/or in kind support.
f. CVs of all the co-PIs and collaborators as well as a list of current funding and funding for the past 5 years must be submitted as part of the application. The industrial collaborator is encouraged to provide support and if so list the specifics of these contributions.
