

A\*STAR  
Graduate Academy

Developing a global nexus of scientific talent

# A★Graduate Academy (A★GA)

A★STAR Graduate Academy (A★GA) advances our human capital development through scholarships, fellowships and collaborative programmes with universities.

It offers scholarships and fellowships to enable young aspiring scientific talent to prepare for an R&D career in biomedical and physical sciences as well as engineering disciplines at top universities locally and overseas.

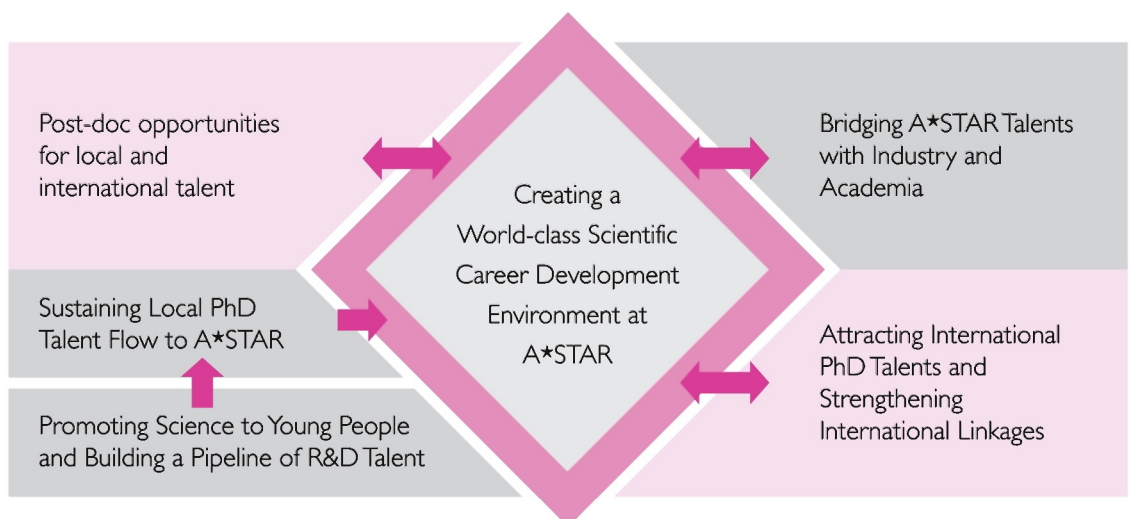

The scholarship schemes include the National Science Scholarship, A★STAR Undergraduate Scholarship, A★STAR Graduate Scholarship, A★STAR International Fellowship, Singapore International Graduate Award and A★STAR Research Attachment Programme for undergraduate, PhD and post-doctoral training. In addition, research internships, student awards and youth outreach and developmental programmes are available for school-going students and undergraduates.

Its awards for international students have also paved the way for a diverse mix of local and foreign talent within A★STAR's research community.

Through its suite of scholarships and fellowships, A★GA ensures a healthy flow of PhD students and early career researchers into A★STAR's laboratories. These talented young people will contribute to A★STAR's scientific network and make A★STAR a nexus for talent from around the world.

## Global Nexus for Research Talent

Advancing R&D human  
capital development through  
scholarships, fellowships and  
collaborative partnerships.
