Carbon Capture & Utilisation (CCU) TSRP Programme

Objective: To address the level of atmospheric CO$_2$ (which accounts for more than 80% of all greenhouse gases) and its associated impact on adverse global climate change by developing technologies and processes to capture, store and utilize CO$_2$.

Participating Organisations

Research Thrusts

- Reduce cost of CO$_2$ Capture
- Develop new technologies for storage of CO$_2$
- Develop new technologies for conversion of CO$_2$ into useful products
