Note: This is a non-chargeable seminar.

ABOUT THE SEMINAR

Whether you are selling stocks or planning materials for production, having your shelves stocked with the right or wrong amount of items can make or wreck your business. Is your warehouse filled with obsolete products?

Are you still looking for new solutions to free up cash tied to your inventories? If you've answered "yes" to these questions, join us and see how companies have achieved significant cost savings using effective inventory planning in uncertain times.

From this session, you will discover the best practices, skills and system for rightsizing inventory with 6Rs:

- **Improving inventory turns with 3Rs:** Right forecasting and Right measurement for Right performance target.
- **Improving inventory performance visibility with 2Rs:** Right benchmark leading to Right positioning.

- **Avoiding excess inventory and stock-out with the final R:** Right inventory policy.

WHO SHOULD ATTEND

Recommend for business owners, supply chain directors, purchasing managers, and sales to attend. Admission is free but limited seats are available. We welcome up to two representatives per company.
