TECH ACCESS
Transform Your Manufacturing Process With Tech Access

50% GRANT FOR SME FROM ENTERPRISE SINGAPORE

Easy Access
Use advanced manufacturing equipment without having to lease or purchase them

Hands-on Training
Gain experience through real-world applications

Expert Advice & Consultancy
Achieve results with the help of qualified technical experts
ABOUT

**A*STAR Tech Access** helps SMEs explore and exploit advanced equipment to boost manufacturing processes. SMEs can gain access to these equipment to prototype new products, qualify new processes and test out new applications. The hands-on learning and experimenting process is a cost-effective way for SMEs to identify the technologies needed to bring their businesses to the next level.

### Benefits

#### Understand New Technological Capabilities
Try out advanced equipment in real-world applications without having to purchase them upfront. Discover what works for your business and make informed equipment investment decisions.

#### Benefit from Expert Advice and Training
Enjoy first-hand access to A*STAR’s technical experts. Gain the skills and knowledge to use the advanced manufacturing equipment effectively in support of your business goals.

#### Minimise Operational Disruptions
Test and deploy advanced manufacturing technologies at an A*STAR facility away from your shop floor. Minimise the potential disruptions to your daily operations.

### Technologies
Access a comprehensive suite of advanced manufacturing equipment under the guidance of A*STAR’s technical experts.

#### Additive Manufacturing
- Hybrid AM Machine
- Metal Binder Jet Printer
- Selective Laser Melting System
- High Pressure Cold Spray
- Fused Deposition Modelling
- Laser Aided Additive Manufacturing

#### Inspection and Quality Measurement
- High-energy 3D X-ray CT System
- X-ray Fluorescence Spectrometer
- X-ray Diffraction
- 3D Non-contact Metrology
- Laser Interferometer
- Stylus Profilometer
- Thermal Cycling Chamber
- Coordinate Measuring Machine
- Humidity Chamber

#### Robotics
- Robotised 3D Scanning and Inspection
- Industry Robot Arm
