

## We would like to invite you to join us in the upcoming virtual workshop for genomics researchers on 2 and 3 June 2021.

This training is designed for bioinformaticians and genomics researchers who are already competent in using the command line to process genomic data. In this training session, you will learn about theory and follow guided steps to start using Amazon Web Services (AWS) services and cloud computing for genomics research:

**Introduction to how the cloud works**

**Starting your first cloud computer**

**Transferring genomics data securely into and out of the cloud**

**Running a typical genomics workflow in the cloud**

**Monitoring your cloud computing cost**

**Please reserve your seat by registering here.**
