

ARAP WITH IMRE RESEARCH AREA: CATALYSIS

#	A*STAR Researcher	Designation	Email Address	Research Area
1	Jason Lim	Deputy Head, Scientist	jason_lim@imre.a-star.edu.sg	This project will focus on the development of new catalysts to transform inert waste plastics into new functional materials or commodity chemicals. The work in my group focuses on development of sustainable catalysis and biodegradable functional materials to contribute towards a circular materials economy.
2	Ming Lin	Senior Scientist	m-lin@imre.a-star.edu.sg	in my lab we are focused on comprehensive materials analysis using electron microscopy, including in-situ and ex-situ approaches. we would like to collaborate with groups who are interested in the understanding of materials growth mechanism.
