

Publications

Associate Professor Justin Chu's Representative Publications (as of 22nd January 2021)

Chen H, Min N, Ma L, Mok CK, [Chu JJH](#) (2020).

Adenovirus vectored IFN- α protects mice from lethal challenge of Chikungunya virus infection.

PLoS Neglected Tropical Diseases. 14(12):e0008910. doi: 10.1371/journal.pntd.0008910.

Robinson KS, Teo DET, Tan KS, Toh GA, Ong HH, Lim CK, Lay K, Au BV, Lew TS, [Chu JJH](#), Chow VTK, Wang Y, Zhong FL, Reversade B (2020).

Enteroviral 3C protease activates the human NLRP1 inflammasome in airway epithelia.

Science. 370(6521):eaay2002. doi: 10.1126/science.aay2002.

Loe MWC, Hao E, Chen M, Li C, Lee RCH, Zhu IXY, Teo ZY, Chin WX, Hou X, Deng J, [Chu JJH](#) (2020).

Betulinic acid exhibits antiviral effects against dengue virus infection.

Antiviral Research. 184:104954. doi: 10.1016/j.antiviral.2020.104954.

Tan YW, [Chu JJH](#) (2020).

Protecting the most vulnerable from hand, foot, and mouth disease.

The Lancet Infectious Diseases. S1473-3099(20)30452-7.

Boonyasuppayakorn S, Saelee T, Visitchanakun P, Leelahavanichkul A, Hengphasatporn K, Shigeta Y, Huynh TNT, [Chu JJH](#), Rungrotmongkol T, Chavasiri W (2020).

Dibromopinocembrin and Dibromopinostrobin Are Potential Anti-Dengue Leads with Mild Animal Toxicity.

Molecules. 25(18):4154.

Deng JG, Hou XT, Zhang TJ, Bai G, Hao EW, [Chu JJH](#), Wattanathorn J, Sirisa-Ard P, Soo Ee C, Low J, Liu CX (2020).

Carry forward advantages of traditional medicines in prevention and control of outbreak of COVID-19 pandemic.

Chinese Herbal Medicines. 12(3):207-213.

Goh VSL, Mok CK, [Chu JJH](#) (2020).

Antiviral Natural Products for Arbovirus Infections.

Molecules. 25(12):2796.

Ahidjo BA, Loe MWC, Ng YL, Mok CK, [Chu JJH](#) (2020).

Current Perspective of Antiviral Strategies against COVID-19.

ACS Infectious Diseases. 6(7):1624-1634.

Kaur P, Lello LS, Utt A, Dutta SK, Merits A, [Chu JJH](#) (2020).

Bortezomib inhibits chikungunya virus replication by interfering with viral protein synthesis.

PLoS Neglected Tropical Diseases. 14(5):e0008336.

Sun J, Yogarajah T, Lee RCH, Kaur P, Inoue M, Tan YW, [Chu JJH](#) (2020).

Drug repurposing of pyrimidine analogs as potent antiviral compounds against human enterovirus A71 infection with potential clinical applications.

Scientific Reports. 10(1):8159.

Zheng Z, Teo SHC, Arularasu SC, Liu Z, Mohd-Ismail NK, Mok CK, Ong CB, [Chu JJ](#), Tan YJ (2020).

Contribution of Fc-dependent cell-mediated activity of a vestigial esterase-targeting antibody against H5N6 virus infection.

Emerging Microbes & Infections. 9(1):95-110.

Loe MWC, Lee RCH, [Chu JJH](#) (2019). Antiviral activity of the FDA-approved drug candesartan cilexetil against Zika virus infection.

Antiviral Research. 172:104637.

Gunaseelan S, Wong KZ, Min N, Sun J, Ismail NKBM, Tan YJ, Lee RCH, [Chu JJH](#) (2019).

Prunin suppresses viral IRES activity and is a potential candidate for treating enterovirus A71 infection.

Science Translational Medicine. 11(516).

Lee CHR, Mohamed Hussain K, [Chu JJH](#) (2019).

Macropinocytosis dependent entry of Chikungunya virus into human muscle cells.

PLOS Neglected Tropical Diseases. 13(8):e0007610.

Lee JK, Chui JLM, Lee RCH, Kong HY, Chin WX, [Chu JJH](#) (2019).

Antiviral activity of ST081006 against the dengue virus.

Antiviral Research. 171:104589.

Kandilya D, Maskomani S, Shyamasundar S, Tambyah PA, Shiao Yng C, Lee RCH, Hande MP, Mallilankaraman K, Chu JJH, Dheen ST (2019).

Zika virus alters DNA methylation status of genes involved in Hippo signaling pathway in human neural progenitor cells.

Epigenomics. 11(10):1143-1161.

Owino CO, Chu JJH (2019).

Recent advances on the role of host factors during non-poliovirus enteroviral infections.

Journal of Biomedical Science. 26(1):47.

Zhang W, Tan YW, Yam WK, Tu H, Qiu L, Tan EK, Chu JJH, Zeng L (2019).

In utero infection of Zika virus leads to abnormal central nervous system development in mice.

Scientific Reports. 9(1):7298.

Lee JL, Loe MWC, Lee RCH, Chu JJH (2019).

Antiviral activity of pinocembrin against Zika virus replication.

Antiviral Research. 167:13-24.

Tan S, Yu CY, Sim ZW, Low ZS, Lee B, See F, Min N, Gautam A, Chu JJH, Ng KW, Wong E (2019).

Pomegranate activates TFEB to promote autophagy-lysosomal fitness and mitophagy.

Scientific Reports. 9(1):727.

Ke Y, Liu WN, Her Z, Liu M, Tan SY, Tan YW, Chan XY, Fan Y, Huang EK, Chen H, En Chang KT, Chan JKY, Hann Chu JJH, Chen Q (2019).

Enterovirus A71 Infection Activates Human Immune Responses and Induces Pathological Changes in Humanized Mice.

Journal of Virology. 93(3).

Bhargava S, Chu JJH, Valiyaveetil S (2018).

Controlled Dye Aggregation in Sodium Dodecylsulfate-Stabilized Poly(methylmethacrylate) Nanoparticles as Fluorescent Imaging Probes.

ACS Omega. 3(7):7663-7672.

Malakar S, Sreelatha L, Dechtawewat T, Noisakran S, Yenchitsomanus PT, [Chu JJH](#), Limjindaporn T (2018).

Drug repurposing of quinine as antiviral against dengue virus infection.

Virus Research. 255:171-178.

Wong KZ, [Chu JJH](#) (2018).

The Interplay of Viral and Host Factors in Chikungunya Virus Infection: Targets for Antiviral Strategies.

Viruses. 10(6).

Min N, Sakthi Vale PD, Wong AA, Tan NWH, Chong CY, Chen CJ, Wang RYL, [Chu JJH](#) (2018).

Circulating Salivary miRNA hsa-miR-221 as Clinically Validated Diagnostic Marker for Hand, Foot, and Mouth Disease in Pediatric Patients.

EBioMedicine. 31:299-306.

Teo FMS, Nyo M, Wong AA, Tan NWH, Koh MT, Chan YF, Chong CY, [Chu JJH](#) (2018).

Cytokine and Chemokine Profiling in Patients with Hand, Foot and Mouth Disease in Singapore and Malaysia.

Scientific Reports. 8(1):4087.

Too IHK, Bonne I, Tan EL, [Chu JJH](#), Alonso S (2018).

Prohibitin plays a critical role in Enterovirus 71 neuropathogenesis.

PLoS Pathogens. 14(1):e1006778.

Min N, Leong PT, Lee RCH, Khuan JSE, [Chu JJH](#) (2018).

A flavonoid compound library screen revealed potent antiviral activity of plant-derived flavonoids on human enterovirus A71 replication.

Antiviral Research. 150:60-68.

Tan YW, Yam WK, Sun J, [Chu JJH](#) (2018).

An evaluation of Chloroquine as a broad-acting antiviral against Hand, Foot and Mouth Disease.

Antiviral Research. 149:143-149.

Min N, Leong PT, Lee RCH, Khuan JSE, [Chu JJH](#) (2017).

A flavonoid compound library screen revealed potent antiviral activity of plant-derived flavonoids on human enterovirus A71 replication.

Antiviral Research. 150:60-68.

Tan YW, Yam WK, Sun J, Chu JJH (2017).

An evaluation of Chloroquine as a broad-acting antiviral against Hand, Foot and Mouth Disease.

Antiviral Research. 149:143-149.

Morchang A, Lee RCH, Yenchitsomanus PT, Sreekanth GP, Noisakran S, Chu JJH, Limjindaporn T (2017).

RNAi screen reveals a role of SPHK2 in dengue virus-mediated apoptosis in hepatic cell lines.

PLoS One. 12(11):e0188121.

Mirza SB, Lee RCH, Chu JJH, Salmas RE, Mavromoustakos T, Durdagi S (2017).

Discovery of selective dengue virus inhibitors using combination of molecular fingerprint-based virtual screening protocols, structure-based pharmacophore model development, molecular dynamics simulations and in vitro studies.

Journal of Molecular Graphics and Modelling. 77:338.

Wu KX, Chu JJH (2017).

Antiviral screen identifies EV71 inhibitors and reveals camptothecin-target, DNA topoisomerase 1 as a novel EV71 host factor.

Antiviral Research. 143:122-133.

Reyes M, Piotrowski M, Ang SK, Chan J, He S, Chu JJH, Kah JCY (2017).

Exploiting the Anti-Aggregation of Gold Nanostars for Rapid Detection of Hand, Foot, and Mouth Disease Causing Enterovirus 71 Using Surface-Enhanced Raman Spectroscopy.

Analytical Chemistry. 89(10):5373-5381.

Chin WX, Ang SK, Chu JJH (2017).

Recent advances in therapeutic recruitment of mammalian RNAi and bacterial CRISPR-Cas DNA interference pathways as emerging antiviral strategies.

Drug Discovery Today. 22(1):17-30.

Wu KX, Phuektes P, Kumar P, Goh GY, Moreau D, Chow VT, Bard F, Chu JJH (2016).

Human genome-wide RNAi screen reveals host factors required for enterovirus 71 replication.

Nature Communications. 7:13150.

Tan YW, Ang MJ, Lau QY, Poulsen A, Ng FM, Then SW, Peng J, Hill J, Hong WJ, Chia CS, Chu JJH (2016).

Antiviral activities of peptide-based covalent inhibitors of the Enterovirus 71 3C protease.
Scientific Reports. 6:33663.

Sun J, Ennis J, Turner JD, Chu JJH (2016).

Single dose of an adenovirus vectored mouse interferon- α protects mice from lethal EV71 challenge.

Antiviral Research. 134:207-215.

Chen H, Parimelalagan M, Takei F, Hapuarachchi HC, Koay ES, Ng LC, Ho PS, Nakatani K, Chu JJH (2016).

Development of 2, 7-Diamino-1, 8-Naphthyridine (DANP) Anchored Hairpin Primers for RT-PCR Detection of Chikungunya Virus Infection.

PLoS Neglected Tropical Diseases. 10(8): e0004887.

Tan YW, Hong WJ, Chu JJH (2016).

Inhibition of enterovirus VP4 myristoylation is a potential antiviral strategy for hand, foot and mouth disease.

Antiviral Research. 133:191-195.

Lani R, Hassandarvish P, Shu MH, Phoon WH, Chu JJH, Higgs S, Vanlandingham D, Abu Bakar S, Zandi K (2016).

Antiviral activity of selected flavonoids against Chikungunya virus.

Antiviral Research. 133:50-61.

Phuektes P, Chu JJH (2016).

Reverse Genetics Approaches for Chikungunya Virus.

Methods in Molecular Biology. 1426:283-295.
