

## ENVIRONMENTAL POLICY

Singapore Immunology Network (SlgN), an entity of A\*STAR Biomedical Sciences Institutes, is committed towards promoting a greener and cleaner environment for our staff, partners and stakeholders to work in. SlgN aims to minimize environmental impacts by incorporating environmental protection practices into the work activities and operations. Further, the Institute strives to protect the environment through the establishment and implementation of an environmental management system.

SlgN is committed to:

- Comply with all relevant environmental legislation and regulations and meet or exceed good environmental practices;
- Communicate and ensure that our staff, students and collaborators take personal responsibility to practice 'Eliminate, Reduce, Reuse and Recycle' and adopt eco-friendly strategies to conserve resources;
- Cooperate with external stakeholders i.e., research partners, contractors, suppliers and other agencies to ensure that work activities take account of environmental impacts;
- Continually monitor and assess environmental impacts on a regular basis and seek to enhance the environmental management system to better manage the environmental risks and hazards; and
- Provide adequate and appropriate resources to facilitate environmental practices conducted within the Institute.

SlgN requires all staff, partners and stakeholders to cooperate in achieving a high standard of environmental management performance, and encourages all in pursuit of this goal.
