

SIgN SEMINAR

Hosted by Prof Kong Peng LAM

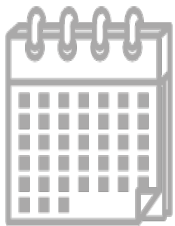

Prof Cassian YEE

Professor, Cancer Medicine
Professor, Immunology
Director, Solid Tumor Cell Therapy
MD Anderson Cancer Centre

T Cell Therapy: Back To The Future

Advances in T cell therapy require a renaissance in translating first principles into clinical practice. Technologies have now achieved a translational inflection point, but they are not being judiciously applied in academia and industry. Prof Yee will present their journey over the last 25 years in cellular therapy driven by first principles, and present the prospects Singapore can achieve, utilizing the potential of cellular therapy to elevate all treatment modalities in a tumor agnostic, patient-centric strategy.

10 October 2025 (Friday)
10 – 11 AM (Singapore Time)

SIgN Seminar Room
8A Biomedical Grove, Immunos, #04-06
Singapore 138648
