Chief Scientific Officer, Genoskin

Peripheral Neuroimmune Circuits: From Fetal Imprinting to Skin Inflammation

Prenatal stress is a repeated exposure to aversive situations during pregnancy, including high emotional strain, and suspected to impact physiological systems in infants. Here we explore how in utero perturbations of fetal neuroimmune interactions can predispose to the development of eczema manifestation at birth. We also uncover new neuroimmune circuits that independently regulate inflammation and itch.

3 December 2024 (Tuesday)
4 PM – 5 PM (Singapore Time)

SIgN Seminar Room
8A Biomedical Grove, Immunos, #04-06
Singapore 138648

*Seminar is
open for all
to attend.*

*Registration
is not
required.*
