Last Mile Logistics Management

BACKGROUND

Last Mile Logistics Management is a suite of applications for last mile planning.

- The web application for planners allows for automatic order planning and real-time monitoring of operations.
- The mobile app for drivers provides job details and caters for proof of delivery.

OBJECTIVES

Last Mile Logistics Management aims to aid companies in increasing vehicle utilization and on-time deliveries. This is achieved via:

- Optimized routes via robust automated planning
- Real-time operations monitoring
- Flexible jobs dispatching
- Detailed tracking of records
- Instantaneous proof of delivery

Total Cost: S$20,000 + GST
$12,300 ESG funding for SME
(Subject to Approval)

FOR SME ONLY
