

Real Time Dashboard

BACKGROUND

In today's globalised, connected and complex business environment, our dashboard automatically pulls all your data into one place, so that you no longer need to manually organise, analyse and present the data. You can now observe how your business is performing in real time, and access information needed for timely decision making.

OBJECTIVES

To help companies implement dashboards with customizable user interface, ability to automatically pull real-time data from multiple sources and perform simple data analytics.
