

# A\*STAR BIOSAFETY LEVEL 3 MOBILE LABORATORY

Established in December 2021, the A\*STAR Biosafety Level 3 (BSL3) Mobile Laboratory is a containment lab designed to facilitate work on Risk Group 3 or BATA First Schedule microorganisms that pose an increased risk of aerosols spread to the individual.

Aligned to World Health Organisation (WHO) guidelines, the BSL3 Mobile Laboratory is furnished with standard equipment for in-vitro assays. Managed by A\*STAR ID Labs BSL3 Platform, the facility can host up to six research teams with a maximum of three researchers per containment lab in the same booking period.
