## Flow Data Analysis Can Be Easy With FlowJo!

FlowJo is one of the longest lasting flow cytometry analysis software and has surely saw numerous established scientists through their academic journey since its launch. Undoubtedly, FlowJo has developed considerably with technology advances, from the early days of 2-4 parameters to the current trend of high dimensional flow cytometry where possibilities are almost infinite. While new plugins were created along the way to cope with the tedious analysis of high parameter flow data, the ease of using FlowJo for basic analysis remains unchanged.

Join us in this basic FlowJo training session, as we go through some of the essential features in FlowJo Version 10.8.1 which will help to kick-start your data analysis!

### Topics to cover:

- Navigating the V10 Workspace
- Creating and editing groups
- Keywords and uses
- Graph Window – Gating & Ancestry
- Workspace templates
- Table Editor
- Layout Editor
- Compensation

**05<sup>th</sup> May 2022 (Thursday)**  
**1 PM – 4 PM (Singapore Time)**
