

# SigN SEMINAR

Hosted by Drs. Melissa Ng and Wu Yixuan

## Christian Schulz

Associate Professor, Cardiovascular Immunology  
Head of Experimental Cardiology,  
Ludwig Maximilian University Munich, Germany

### Innate immune responses in cardiovascular injury

Christian Schulz is Associate Professor of Cardiovascular Immunology and Head of Experimental Cardiology at the Ludwig Maximilian University Munich. He graduated from Goethe University in Frankfurt, where he obtained his MD in the Department of Cardiovascular Physiology. He undertook his specialist training in Internal Medicine at the Technical University in Munich. Thereafter he worked as Postdoctoral Fellow and Senior Lecturer at the Department of Immunology at King's College London, UK. He teaches in Medicine and Immunology, and is coordinator of a Clinician Scientist Program to integrate translational research and patient care. His research interest is the body's response to sterile inflammation and how innate immunity shapes cardiovascular diseases. He studies the properties of immune cells in mice and men, aiming to provide a detailed understanding of their regulation, which may lead novel interventions in inflammatory diseases.

#### In Person

**26<sup>th</sup> August 2022 (Friday)**

**10:30 AM – 11:45 AM (Singapore Time)**

**SigN Seminar Room, Immunos, Level 4**

**8A Biomedical Grove, Immunos, #04-06, Singapore 138648**

*Seminar is  
open for all  
to attend.*

*Registration  
is not  
required.*
